# Class Assignment–1

Discovering Unix Commands

**Dr. Sandesh Gupta**

| **Name:** | **Roll Number:** |
|---|---|
| **First letter of your name:** | **Branch/Section:** |

## Your Task

**Find Commands Beginning with Your Initial**

Find **five Unix commands** beginning with the first letter of your name.
Use the Tab key to discover possible commands and use `man` to read about each command.

**Example:** If your name is **Aman**, search for commands beginning with the letter **a**.

**Completion and Submission Instructions**

1. This is an **individual take-home assignment**.
2. Practise the commands after the class using a Linux or Unix terminal.
3. Write the completed assignment neatly on A4-size sheets.
4. Keep the sheets in your A4 assignment file.
5. At the top of the first page, clearly write:
   - your name;
   - roll number;
   - branch and section; and
   - assignment title.
6. For every command, write:
   - the command name;
   - the command's purpose in your own simple words; and
   - one useful option or example found in its manual page.
7. Submit the assignment in the **next class**.
8. Do not copy another student's command list or description.

**If Linux Is Not Installed on Your Computer**

You may use the free browser-based Linux terminal:

```
https://www.webminal.org/
```

Webminal provides a Linux terminal inside a web browser. No Linux installation is required. You may need to create a free account before using the terminal.
After opening the terminal:

1. Type the first letter of your name.
2. Press the Tab key twice to see matching commands.
3. Select a command from the displayed list.
4. Read its manual using:

```
man command_name
```

5. Press q to close the manual page.

**Safety note:** Do not use your university, email or banking password while registering on an external website. Create a separate password for the website.

## Steps to Follow

1. Open the terminal.
2. Type the first letter of your name.
3. Press the Tab key twice.
4. Observe the commands suggested by the shell.
5. Select any five commands beginning with that letter.
6. Read the manual page of each command by typing:

```
man command_name
```

   For example:

```
man awk
```

7. Press q to leave the manual page.
8. Write the command names and their purposes in the table below.

**Important**

- Do not run an unfamiliar command merely to see what happens.
- First read its manual page and understand its purpose.
- Write the purpose in your own simple words.
- Do not copy another student's list.
